PROFESSIONAL SUMMARY

Customer operations builder with 14+ years designing and governing quality, compliance, and audit systems for high-stakes environments — including a 4-country payroll compliance framework and a \$500K operational budget at Amazon. Hands-on with AI-native workflows (Claude, custom GPT systems) and self-taught across CRM, documentation, and process-automation tooling. Fluent in root-cause investigation, cross-functional escalation, and turning process gaps into documented fixes, honed managing 24/7 service operations where precision and judgment carried real financial and reputational stakes.

CORE COMPETENCIES

Customer & Service Operations: Service Quality & Customer Experience, Escalation & Root-Cause Resolution, Compliance & Audit Coordination, 24/7 Contact Center Operations, Cross-Functional Coordination (Finance, HR, Vendors)

Operations Strategy: Process Architecture, Workflow Design, SOP Documentation, Operational Excellence Frameworks, Change Management, Continuous Improvement

Performance & Metrics: KPI Framework Design, Quality Audit Systems, Dashboard Design, Business Reviews, Compliance Frameworks

AI & Automation: LLM Workflow Design, Prompt Engineering, AI-Assisted Process Mapping, Document Automation, AI-Augmented Audit & Reporting

Tooling: Claude (Anthropic), ChatGPT, Custom GPTs, CRM & Ticketing Systems, Notion, Asana, Google Workspace, Microsoft 365, Slack

PROFESSIONAL EXPERIENCE

Customer Service Manager & Leadership Development Lead — Amazon — San José & Heredia, Costa Rica

July 2010 – April 2024

- Reduced payroll-related errors and escalations across a 4-country operation (Mexico, Costa Rica, Colombia, Brazil) by 35% in user-experience metrics, by designing and governing a multi-layer quality audit framework and training 20+ regional teams on compliance protocols.
- Resolved escalated service, payroll, and compliance issues within a 24/7 operational environment supporting a \$500K budget and 165-person org, by applying root-cause investigation and cross-functional coordination across QA, operations, and leadership teams.
- Developed quality assurance documentation and audit protocols for payroll operations, mentoring junior analysts on QA best practices.
- Conducted 350+ structured behavioral interviews (Amazon Bar Raiser methodology) and designed a manager development pipeline that generated 50%+ of internal promotions while reducing ramp-up time by 60% during Amazon's hyper-growth phase.

Co-Founder & Operations Architect — Cawhi Consultores — San José, Costa Rica

October 2024 – Present

- Replaced ad-hoc, error-prone service delivery with a measurable audit and documentation system for an 800-capacity venue operating at 25% capacity, by designing 15+ digital audit forms and a five-layer continuous-improvement architecture — building process infrastructure from scratch.
- Cut consulting delivery time 50–70% per client engagement by natively embedding AI tools (Claude, custom GPTs) into diagnostics, documentation, and reporting workflows.
- Led organizational climate diagnostics for 5 clients across hospitality, financial services, manufacturing, and printing industries in the first 12 months, converting 60% of engagements into retainer contracts through disciplined, structured follow-through.

EDUCATION & CONTINUOUS DEVELOPMENT

- High School Diploma — Stratford Career Institute
- Amazon Leadership Principles & Bar Raiser Interview Methodology (internal certification)
- Self-directed study: AI/LLM systems, prompt engineering, process automation, compliance frameworks
